

Make the Biggest Impact

Your donations to Lurie Children's play a big role in providing a healthier future for every child.

Lurie Children's Community Fundraising team can work with you to direct your fundraising proceeds to make the biggest impact or to support a specific program like the areas listed below.

Access for Every Child

Contributions to the Access for Every Child fund help provide whatever patients need to thrive—from superior medical care, to supportive services, to financial assistance and help with basic needs—throughout the course of a child's care.

Heart Center

We care for patients with the most complex and serious heart conditions from before birth through adulthood. Your support helps us explore the causes of heart disease, perfect new interventions to provide better options and develop innovative strategies to protect against cognitive and psychosocial impairments.

Mental Health Services

We've expanded our care model to integrate mental health evaluation and treatment into primary care because mental health, just like physical health, is fundamental to a child's well-being. Your donations help us train staff to recognize and address a child's behavioral health needs in every clinical encounter.

Neonatology

Our neonatal intensive care unit is a Level III facility, the highest designation in Illinois. This means we have the specialized expertise and comprehensive resources needed to treat the smallest and sickest babies. Your investment allows us to advance neonatal care and give infants the opportunity to live to their full potential.

Research

Researchers at Stanley Manne Children's Research Institute at Lurie Children's are discovering new and better ways to prevent, diagnose and treat childhood diseases. Given the scarce federal funding for pediatric research, we rely on philanthropy to help us find cures.

Family Services

We address the emotional, relational and financial impact of a child's illness on the whole family through our Family Services programs. From innovative educational opportunities to critical spiritual and social work support, our Family Services programs are funded almost entirely through philanthropy.

Patrick M. Magoon Institute for Healthy Communities

Our Magoon Institute initiatives help children thrive by extending our clinical expertise into the community. Donations support children in local neighborhoods through health education, safety training, violence prevention, and other programs.

Cancer and Blood Disorders

We are a regional and national referral site for children with brain tumors, leukemia and thalassemia. Your donations can support breakthroughs that result in the highest cure rates and improved quality of life for patients with cancer and blood disorders.

Find the best way to direct your giving.
